

An Overview of PRIO Datasets

Scott Gattes and Håvard Hegre
Center for the Study of Civil War, PRIO

This is not a paper per se, but a presentation to the PAC network to inform them about the data we have available at PRIO. PRIO has developed a number of datasets that regard: conflict (Uppsala/PRIO Conflict Database -- Start & end dates; conflict sub id Level; and casualties); GIS datasets (Geography of conflict; Rivers; Resources; Diamonds; Drugs; Oil); and Political Systems (Vanhanen; MIRPS). PRIO also hosts a number of other Journal of Peace Research replication datasets. Our presentation will review our archives and show how to navigate the PRIO site to download those datasets that are currently posted on the PRIO website. Future plans for archiving other datasets will also be discussed.
